**Subject: Airbus Supply Chain Cyber Security - Cyber maturity recognitio**

Dear Supplier,

The aerospace industry is currently facing a sophisticated and unprecedented escalation of cybersecurity threats. In this volatile landscape, the security of our digital ecosystem is no longer a technical preference; it is a fundamental pillar of our collective operational continuity.

In addition, Information Security and Cybersecurity are increasingly becoming a regulatory topic internationally, evidenced in Europe by EASA PART-IS regulation and NIS 2 directive focusing on resilience.

Our collective ability to protect our data and ensure the integrity of our global operations depends directly on the cyber maturity of each individual company.

In this context, Airbus recognizes the following cyber certifications and programme as a evidence of cyber maturity:

- AirCyber (Bronze Level and above) from BoostAeroSpace.
- \*ISO27001.
- \*SOC 2 Type II Audit report.
- \*CMMC Level 2.

Please see further details in Annex 1.

For a certification to be recognized, it must meet the following criteria:

- be valid (not expired), and,
- cover the business areas and sites relevant for the supplier's Airbus activities.

Please note that while these certifications will be considered to provide evidence of cyber maturity, they are without prejudice to the security requirements contained in the contract terms in place between our companies and do not supersede Airbus' rights to organize compliance checks through security audits when appropriate.

As an Airbus supplier, we highly recommend that you continuously improve your cyber maturity by obtaining one of the above-listed, or equivalent, certifications/programmes.

Best regards,

Cyber maturity referential	Scope & Objective
*ISO 27001	The international benchmark for Information Security Management Systems (ISMS), ensuring a systematic approach to managing sensitive company information.
AirCyber (Bronze level & above)	A dedicated aerospace service by <b>BoostAeroSpace</b> . It provides specialized assessments and remediation plans to align supplier protection with industry-specific threats.
*SOC2 Type II audit report	Developed by the *AICPA, this is the global trust standard for SaaS and professional service providers, focusing on security, availability, and processing integrity.
*CMMC (Level 2 & above)	Mandatory for companies handling Controlled Unclassified Information (CUI) within the US Defense Supply Chain. A critical gateway for US Department of Defense (DoD) related activities.

- \*ISO: International Organisation for Standardisation
- \*SOC 2: Systems and Organization Controls 2
- \*AICPA: American Institute of Certified Public Accountants
- \*CMMC: Cybersecurity Maturity Model Certification
